

Reliability

you can trust
to keep you on the road

Quality Endurance Passion

A Partner you can rely on

With Gulf you get the benefit of more than 100 years global experience and technical innovation.

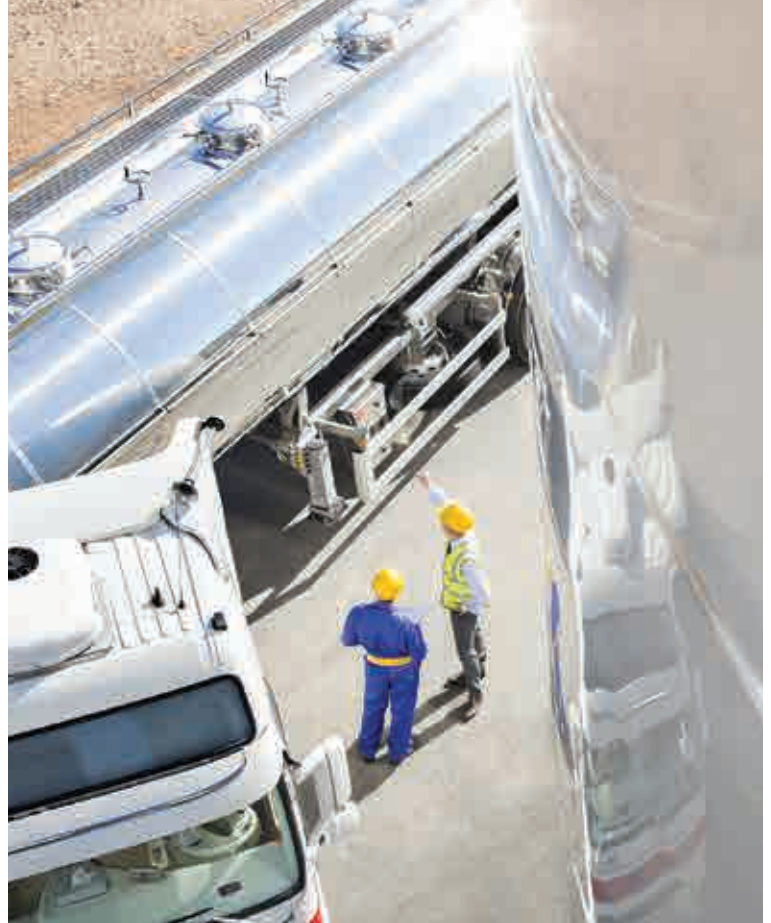

With operations in over 100 countries, Gulf remains committed to customer service with a range of lubrication solutions tested and proven to give the best performance in commercial vehicle applications.

Our values are at the heart of everything we do, and it's our passion and commitment to our customers that really sets us apart – offering the personal attention that is sometimes lacking in other large organisations.

We understand the operational demands of your transport business and, whatever your needs, we can respond quickly with solutions to make your business more efficient and profitable.

Our priority is to work with you to achieve the best possible performance from your vehicles – whether you're managing a small or large fleet, transporting goods or people, providing municipal services, or servicing and maintaining commercial vehicles for fleet customers.

Gulf's expertise has evolved by recognising new technology needs from the major vehicle and component manufacturers and years of working with commercial transport customers to understand the needs of their business.

Combining this knowledge, we aim to help the continued success and profitability of your business: whether you are looking for lower fuel costs, longer intervals between maintenance, improved reliability, cost control or environmental impact, we can offer a solution.

We realise running a fleet of trucks or buses is hard work. Your vehicles need to be on the road as efficiently as possible. We aim to help you protect your vehicles, minimise unscheduled downtime and maximise your productivity.

You can rely on Gulf lubricants to provide uncompromising performance, for all types of trucks, buses and coaches, for engines, transmissions, axles and hydraulics, for every climate, for every country and for every type of operation.

Fully synthetic high quality engine motor oils

Fully synthetic motor oils for latest high performance commercial vehicles.

Gulf Superfleet Universal 10W-40

Low SAPS" synthetic premium heavy duty diesel and gas engine oil.

Recommended for EURO VI, EURO V and earlier emission norms, in the engines equipped with after treatment systems such as Diesel Particulate filter (DPF), Gas engine requiring Euro 6 quality engine oils. This oil is designed by keeping in view the wide range of ACEA and API specifications for use in a fleet having different makes of engines with and without DPF requiring extended drain oils.

SPECIFICATIONS AND APPROVALS

Services

you can trust

Gulf can offer you more than just leading lubricant technology. Additional services can support you in running your fleet. We can provide technical training for your maintenance team, lubricant surveys and schedules, and advise on environmental aspects of lubricant usage. In the event of a performance issue, Gulf can provide analysis of used oil samples to try and identify the cause. If you have any questions about lubrication, please speak with your Gulf contact

“ Gulf has a reputation for quality and this is reflected through the brand and organisation from its products, to its services and people. ”

At Gulf, we have dedicated ourselves to working with each of our customers to understand their needs, solve their operational issues and build a long-term relationship based on trust and performance.

Whatever the nature and extent of your transport operation, you can depend on us to create and recommend the right solutions at the right time.

To discuss your needs in more detail, or if you want to find out more information, please get in touch with your local Gulf representative.
